

PANDO

Pando × QuitCode — Feature Reconciliation Worksheet

Column 5 (QC status) and column 6 (Built in / version / date) are left blank for QuitCode to complete. "In scope?" reflects the latest spec v3.2 + Addendum A1 + subsequent instructed changes; "No — later strategy addition" means the strategy now implies it but QC has not been asked.

Feature / capability	Plain English	Phase	Explicitly in latest QC scope/spec?	QC status	Built in / date	Notes / gap
Accounts / onboarding						
Phone-based account + OTP at submit	Number verified by code; nothing stored before	Seed Tool	Yes			Consent+OTP copy instructed Aug
Consent record (text version + timestamp)	Proof of what she agreed to	Seed Tool	Yes			Verify visible in admin
Resumable seed flow (autosave)	Close and come back	Seed Tool	Yes (built)			Confirmed in screenshots
Seed account carries into pilot	No re-registration	Pilot	Yes			
Contribution-first flow order (v4.1)	Help first, profile after	Seed Tool	Yes — instructed Aug			Await committed date
Progressive ordinary-user onboarding	New users join by texting	Pilot	Yes			
Parent profile						
Children stored as birth years	Ages rot; birth years don't	Seed Tool	Yes — instructed			Age-taps convert at capture
Neighborhood, schools, communities (data-driven list)	The trust-graph edges	Seed Tool	Partially			Awaiting Janet's 118-option CSV
Local tenure, family/work setup, childcare level	Matching context	Seed Tool	Partially			Multi-selects instructed, not confirmed
Logistics, spending preference (plain-language label)	Practical matching	Seed Tool	Partially			Rename from "budget posture" instructed
Lived-experience topics (incl. sensitive lanes)	What she can help with	Seed Tool	No — later strategy addition			Was in v4; QC build showed gaps
Trust circles (soft ranking boost, multi-select)	Whose answers she'd trust most	Seed Tool	Yes — adjudicated			Copy change instructed
Privacy/display controls; PRIVACY keyword	Limit display, never matching	Pilot	Yes			
Community Access						
Five-question minimum (supersedes 3)	The reciprocity agreement	Seed Tool	No — new decision, must be instructed			Options: 5 / 10 / as-relevant; old 1/3/5 removed

Feature / capability	Plain English	Phase	Explicitly in latest QC scope/spec?	QC status	Built in / date	Notes / gap
Unified proactive allowance (all request types)	One budget	Pilot	Yes			Ceiling 10, 48h spacing
Skip any individual ask; guilt-free copy	Always optional	Pilot	Yes — instructed			One-tap decline reasons
Own questions + voluntary contributions excluded	Only proactive asks count	Pilot	Yes			
Community Access eligibility gating answers	Reciprocity has teeth	Pilot	Unclear			Confirm answer pipeline checks opt-in level
Recommendations (capture)						
Activity/camp/place/tip types; firsthand flag; child age at experience; dates; duration	Structured records	Seed Tool	Yes (built)			
Strengths, caveats, fit, who-not-for	The useful specifics	Seed Tool	Partially			Caveat capture confirmed; fit/who-not verify
Price + value + benchmark consent	Money context	Seed Tool	Yes (built; formatting bug)			"50 100 /month" bug flagged
Recommend-again; follow-up willingness	Reuse permissions	Seed Tool	Yes (built)			
AI extraction + confirm-back + low-confidence critique	Machine drafts, human decides	Seed Tool	Yes (built)			Reasoned critiques confirmed
Admin review: add / friendly-ask / hold; "added to Pando" user copy	Never "rejected"	Seed Tool	Yes — instructed			Verify Reject sends nothing blunt
Reward triggers on ADDED (not submitted)	Money follows quality	Seed Tool	Unclear			Reward-earned showed 0 vs 2 approved
Ask-anything intake						
Free-text intake; topic/local/sensitivity/urgency/stage classification	Routing brain	Pilot	Yes			
Named-person detection → restricted review	Never auto-enters knowledge	Pilot	Yes (built in admin)			Confirmed in routing table
Universal demand record (banked questions)	Every question saved	Seed Tool	Yes			
Banked-question 3 states (records/work/hold; never auto-send)	Founder-controlled release	Pilot	Yes — instructed			Confirm built
Answers						

Feature / capability	Plain English	Phase	Explicitly in latest QC scope/spec?	QC status	Built in / date	Notes / gap
Composer: general + existing + fresh, labeled by component	The village of views	Pilot	Yes			Component-level labels — verify
Freshness display; privacy-safe provenance; k≥5 group naming	Trust rendering	Pilot	Yes			
"See the breakdown" behind summaries	Depth on demand	Pilot	Partially			
Network Asks						
Passive queue (free, deliver-when-known)	The saved question	Pilot	Yes			Flag-on-new-match instructed
Open Ask board digest (≤1/day, ≤3 questions, 2-appearance rule, 24h post-or-backstop)	The neighborhood board	Pilot	No — later strategy addition (instructed in Slack, confirm in spec)			New opt-in stream + STOP
Targeted Ask (3–5 matched, human-review for complex)	The shoulders tap	Pilot	Yes			Precision folded — confirm spec updated
Last-Minute Care	Urgent care	Later	Yes (spec'd, deferred)			Do not build
Eligibility/ranking/rotation /spacing	Fair matching	Pilot	Partially			Rotation instructed Aug
Response collection → review → delivery → write-back	The loop	Pilot	Yes			
Usefulness + outcome tracking (7–14d loop close)	Did it help?	Pilot	Yes			
Guarantee: clock from approved routed question; auto-credit; liability tracking	Answered or credited	Pilot	Partially			Clock-start rule instructed
Sensitive questions						
Immediate supportive response; safety classification	Warmth first	Pilot	Yes			
Asker-description preview + approval	She controls her story	Pilot	No — new (this prompt)			Add to QC scope
Small matched cohort; privacy-safe outreach	Community on demand	Pilot	Yes			
"See what parents said" + permissioned excerpts + per-response permissions (4 flags)	Depth with consent	Pilot	Yes			
Anonymous follow-up (one)	Continued help	Pilot	Yes			

Feature / capability	Plain English	Phase	Explicitly in latest QC scope/spec?	QC status	Built in / date	Notes / gap
"Did this help you feel less alone?"	The metric that matters	Pilot	Partially			
Double-opt-in introduction	Real connection	Later	Yes (later)			
Escalation trees (medical/legal/safety/abuse/self-harm)	Professional handling	Pilot	Partially			Runbook owed by Janet
Digest						
Manual curated SMS Digest (3 items, reply 1-2-3, ≤1 per 2 wks)	Smallest testable version	Pilot	No — new; instruct as light build			Send + reply routing + opt-out only
Personalization engine (stage/local/seasonal/prior-questions)	The full Digest	Later	No — later			Post-GO with Pando+
Engagement learning (read/tap/reply/not-relevant)	Gets more selective	Later	No — later			
Caregiver availability alerts	The premium hook	Later	Partially (A1 alerts)			Consent-per-alert
Founding Contributors						
Qualification (profile + consent + opt-in + 2 added)	Who counts	Seed Tool	Yes			Opt-in level: now 5 (new)
Status permanence; early access; extra free Ask; \$99 offer	The founding deal	Pilot	Yes			Stagger 2nd free Ask? (open)
Referrals: activation-based, cap 3, shareable card	Growth by quality	Seed+Pilot	Yes			
Async approval/reward messages	"That's two — Founding Parent"	Seed Tool	Yes — instructed			
Contributor quality + rewards						
Hidden ledger (used/acted/helped/thanked/corroborated/freshness)	Quiet reputation	Pilot	Yes			
Seed \$15 payout + contest entry on ADDED	Founding thank-you	Seed	Yes			Payment rails manual
Fee-share experiment fields (tier, paid-flag, cohort tags)	Wk-8 test instrumentation	Pilot	Yes — instructed			No payment build; manual payouts
No public scores anywhere	Constitutional	All	Yes			
Caregivers						

Feature / capability	Plain English	Phase	Explicitly in latest QC scope/spec?	QC status	Built in / date	Notes / gap
Six need-types as intake framing	Night nurse → same-day sitter	Pilot (capture)	No — new framing; instruct			Capture now, products legal-gated
Private nomination; firsthand-only; care history; strengths; fit	The supply engine	Seed Tool	Yes (built)			Under-18 gate confirmed
Concern channel (restricted, human-only, never AI-summarized)	Safety without publication	Seed Tool	Yes (built)			"Held for a person" confirmed
Rehire + review-hold; reference willingness; pay + benchmark consent	The trust record	Seed Tool	Yes			
Needs-change (3/6/12mo) + check-back consent	The unique asset	Seed Tool	Yes			
Caregiver invite (parent-sent, anti-scam copy) → consent → profile → discoverable (ID-verified) → introducible	The consent ladder	Pilot	Yes			6 states; admin shows 4 — confirm
Masked messaging / pay-to-connect	Post-match relationship	Later	No — later (evaluated App. B)			Manual intros in pilot
References / checks / booking / payroll	Care infrastructure	Later	No — later			Partner strategy
Schools / B2B						
School-specific invite links + private affiliation confirm	The distribution channel	Pilot	Partially (group links exist)			Verification flow to spec
Privacy boundaries (school sees nothing individual)	The firewall	Pilot	Yes (architecture)			Write into contract template
School Digest items	Deadlines etc.	Later	No — later			
Sponsored accounts	Paid tier	Later	No — later			
Marketplace	All	Later	No — later			Nothing to build
Payments						
Stripe: Ask charges, first-free, refunds/credits	Money in	Pilot	Yes			
Credits/entitlements ledger	Guarantee + referrals	Pilot	Yes			Liability tracking
Caregiver charges	Match fees	Later (legal)	Yes (gated)			
Listening-ear opt-in at signup (sensitive-question willingness flag)	"Would you answer a hard question, anonymously?"	Seed Tool	No — new; instruct			Two-tap; draws from same allowance

Feature / capability	Plain English	Phase	Explicitly in latest QC scope/spec?	QC status	Built in / date	Notes / gap
Allowance tier copy: "Now and then (5)" / "Happy to help more (10)" / "Ask me anytime relevant"	Plain-language contact settings	Seed Tool	No — new; instruct			Replaces 1/3/5 options
Board/Digest answers excluded from allowance but counted as giving (community-access credit)	Voluntary help earns access	Pilot	No — new; instruct			
Digest depth unlock: answer 1 board question → full Digest access this week	Reciprocity you can feel	Pilot	No — new; instruct			
Leaves ledger (private: 1 per added-and-used answer; posted redemption rates)	Contributor rewards made visible	Pilot	No — new; instruct			5=Ask, 15=month, 40=year
Two-reference gate for nanny listings (1 ref → held for review)	Quality floor for discoverability	Pilot	No — new; instruct			Babysitters: 1 ref + ID
Caregiver availability text opt-in (days free; below-min-rate opt-in, private)	Availability without a calendar	Pilot	No — new; instruct			Calendar = later
School-Facts contributor type (staff answers labeled "official information")	Facts from school, texture from parents	Pilot	No — new; instruct			Never routes first; labeled source
Free-pilot Last-Minute Care flow (honest-failure copy; strong areas only)	Urgent sitter, free during pilot	Pilot	No — new; instruct			No payment build needed
New prices: Board \$5 · Targeted \$15 · Pando+ \$19/\$149	Repriced	Pilot	No — config change; instruct			First Targeted still free
Instrumentation						
Activation, questions, unprompted-second, category spread	Gate family 1	Pilot	Yes			
Contributor response by ordinal; concentration; cap-exhaustion	Gate family 4 + capacity	Pilot	Yes — instructed			Export additions Aug
Usefulness, action, thanks, reuse-rate	Gate families 3 + reuse	Pilot	Yes			Reuse must-pass added
Founder-rescue tag (at the moment)	Ex-rescue truth	Pilot	Yes — instructed			
"Felt less alone"; sensitive usage	The soul metric	Pilot	Partially			

Feature / capability	Plain English	Phase	Explicitly in latest QC scope/spec?	QC status	Built in / date	Notes / gap
Digest engagement	Habit test	Pilot (light)	No — new			With manual Digest
Paid conversion after free	THE paid signal	Pilot	Yes			

Open questions

- 1. The five-question minimum is right for capacity and risky for conversion — pre-commit the fallback now.** Five is honest (it's what the network actually needs), but it's also a bigger promise at the exact moment a stranger decides whether to join. Watch the seed opt-in rate; write down today the trigger at which you'd drop to three (e.g., if fewer than 60% of otherwise-completing parents accept). Deciding the fallback before the data arrives is the only way the decision stays clean.
- 2. Six caregiver products should not mean six things on a menu.** Parents don't shop tiers; they have a situation. Keep one front door — "tell Pando what care you need" — and let the six products live behind it as internal routing + pricing. A visible six-SKU care menu at launch reads as an agency price list, and the legal gate means most of it can't be sold yet anyway.
- 3. Pay-to-connect must be worded as paying for work, never access — or it collides with your own constitution.** "Money buys mobilization, never access" is load-bearing. The masked-contact fee survives that rule only if every surface says the family is paying for the matching work (references, fit, mutual interest confirmed) and contact release is simply its completion. One wrong sentence on a pricing page turns your best mechanic into a violation of your best principle.
- 4. The Digest is the strongest habit idea in the strategy and the biggest scope-creep risk in the build.** Answer to your direct question: yes — it could genuinely make Pando a weekly habit, because it's the only feature that shows up between needs; and yes — the full personalization engine is exactly the "content machinery" trap. Resolution: ship only the manual three-item version in the pilot (zero build beyond send/reply/opt-out), and let its reply rate — not enthusiasm — decide whether the engine gets built.
- 5. Is Pando still one product? Yes — today, and only on one condition.** Everything current shares one front door (text Pando), one asset (consented experience), one trust model. The moment any surface makes a parent choose between "Pando the Q&A service," "Pando the nanny agency," and "Pando the marketplace," you're building three companies. The condition: caregivers, Digest, marketplace and schools remain ways Pando answers, never destinations of their own. Appendix G is the honest warning — the strategy now implies meaningfully more than QuitCode has been asked to build, so sequence ruthlessly: the seed date outranks every new idea in this package.
